

il Dr. Alberto Mezzetti

*Laboratoire de Réactivité de Surface, Sorbonne University, Paris,
France*

terrà un ciclo di lezioni in videoconferenza dal titolo:

Time-resolved infrared spectroscopy: A valuable tool in the study of the mechanism of chemical reactions

February 6th, h 10 - 12 The experimental methods (highlighting the most recent developments)

February 7th, h 10 -12 A focus on band assignment and reaction triggering

February 8th, h 10 - 12h Photo-induced reactions (selected exemples)

February 9th, h 10 - 12h Non-photoinduced reactions - catalysis, biochemistry, and reactions in solutions (selected exemples)
