

Prof. Claudio Pettinari was graduated in Chemistry from the University of Camerino (1989). His field of expertise covers inorganic, organometallic and coordination chemistry, in particular: synthesis of biologically active metal complexes, new catalysts, advanced materials, metal-organic frameworks.

Faculty member and full professor at University of Camerino and CNR associate (ICCOM-Florence), Claudio Pettinari was co-founder of the International School of Organometallic Chemistry. He was awarded the Bonati prize and the Nasini Medal from the Italian Chemical Society, Doctor HC from the University of Galati, member of the Academy of Science of Lisbon. President of the consortium REDI (Reducing Risks of Natural Disaster), President of CRUM (Conference Rectors of Marche), Member of board of ALMALAUREA, INSTM (Istituto Nazionale Scienze e Tecnologie dei Materiali). In 2017 Claudio Pettinari was appointed as Rector at the University of Camerino; from January 2021, he was appointed member of the Board of the Conference of Italian University Rectors (CRUI) and from September 2021 CRUI delegate for Research and Third Mission. On december 2022 he has been elected Vicepresident of Società Chimica Italiana.
